Node20 on IBM i

It is time to get back to Node.js on the IBM i.

Node.js v20 is the latest version of this great programming language. Please note that Node.js v14 moved out of support from April 2023, so time for you all to upgrade, and what should you upgrade to?

My recommendation is going to be Node.js v20.......

A Screen a Story - Pre-power down system exit point?

The Exit point functionality available within IBM is what I would call a hidden gem. If we just lo at the Pre-power down Exit Point my guess you will agree. In my article of last month th Start-up program was handled. Now it is time look at the Pre-power down program.....

FormaServe and NC Communications join forces

FormaServe, a leading provider of IBM i training and consultancy services, and NC Communications, a specialist in IT events and media production, have announced a strategic partnership to publish PowerWire, the IBM Power newsletter.........
